## HTA-2000B High-End Hybrid Amplifier with built-in DAC Converter

TAGA Harmony HTA-2000B is a high-end hybrid integrated amplifier utilizing a 12AX7 tube preamp section with a cathode type amp circuit and a 12AU7 SRPP stage serving as a buffer amplifier. This solution ensures a very warm, linear and lifelike sound with high dynamic presentation at the same time.

The HTA-2000B can be used with variety of analog and digital sources. It has 3 analog gold-plated stereo RCA inputs built-in as well as a digital interface with 2 inputs (Coaxial and Optical) using 24 bit / 192 kHz digital-analog conversion. Besides our amplifier offers wireless connectivity based on **Bluetooth®** wireless technology.

If you are looking for a powerful amplifier with the smooth natural sound that only a tube amp can provide, the HTA-2000B is probably the best choice on the market. It offers the best sound quality which is more than hard to overcome in its price point.

Class A / B

Power Output	2 x 100W, 8ohm, Class A/B
DAC Resolution	24bit / 192kHz
Vacuum Tubes	2 x 12AX7; 2 x 12AU7
Inputs	Analog: CD, Line, AUX Digital: Optical, Coaxial
Signal/Noise ratio	90dB
Connectivity Wireless	<b>Bluetooth® v4.0</b>
Frequency Response	20Hz – 20kHz (+/- 0.5dB)
Power Requirements & Consumption	220V - 230V 50/60Hz, 380W
Dimensions (H x W x D)	15.5 x 43 x 37.5 cm
Finishes	Black, Silver-White

The high-performance tubes and precise high voltage transistor hybrid power supply provide voltage stability and very low AC ripple current. It reflects in a more natural and fresh sound with deep multidimensional soundstage.

The high-power transistors utilized in the 0dB current amplification circuit reveal more content of the music, giving extra pure energy and dynamics to drive even very demanding and powerful speakers.

The tube circuit cross-connected with audiophile grade MKP capacitors ensures stable playback improving music tone and sound field depth.

The audiophile grade Japanese ALPS volume potentiometer provides minimal noises and channels crosstalk and has excellent operational feel and limits errors between the two channels.

The oversized aluminum heat sink system helps to disperse internal heat and allows for long term high power playback with limited distortions.

The high-end class, gold-plated speaker terminals offer almost lossless audio signal transmission to speakers.
